

Spotlight on Prescott Clubs

First semester, 2017

WE ARE HEALTHY AND FIT

Clubs that promote healthy eating habits and engage children in vigorous physical activities are a priority in our program.

Kid Fit, Fitness Club, Tennis and Yoga Clubs all focus on actively engaging children in a variety of fun games while developing specific skills such as coordination and physical strength.

Choose Health, Fitness and Fun Club has been involving children in nutrition and cooking experiences in addition to physical activity related lessons teaching students about the importance of both exercising and eating healthy.

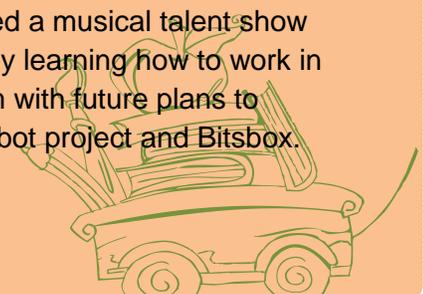

WE ARE SMART

“Readers Theater Club has been reading plays about a large chicken, a lonely fish and a Cinderella with big feet! We discussed the plots and how the story developed in each play and practiced our reading skills. The most fun is acting the plays out on stage!” (Deb Cawley, club leader)

In **Book Club** students have learned about a variety of genres, improved their vocabulary and strengthened their reading and writing skills.

Using the engineering method and their imagination, students in the **Makerspace Club** created with Legos, Keva, Quibits and learned how circuits and remote-control machines work.

Coding Club created a musical talent show and a music video by learning how to work in the Scratch program with future plans to explore Dash the robot project and Bitsbox.

Dear Prescott Parents, Staff and Community Partners

As we are approaching the end of the first school semester, we would like to give you a glimpse into what Prescott students have been involved in during the out-of-school hours.

Our focus continues to be on striving to offer quality programs by developing partnerships with the school staff, parents and the community.

Academic opportunities as well as enrichment activities are carefully chosen not only to respond to needs, but also to capitalize on students' interests and passions. Finally, building social skills, making friends and having fun are part of each club.

A desire to involve the whole child in the educational process guides the work.

OUR THANKS:

We thank all our club leaders for their dedication and hard work in creating and delivering excellent extended learning opportunities.

We thank all community partners for their support over the years: 21st Century Community Learning Centers, Nebraska Arts Council, Lincoln Arts Council, Community CROPS, Fit 4 Lincoln, University of Nebraska, Woods Tennis Center, Yoga 4:8 Studio.

The French Club has immersed the children into a different culture and language through games, music, individual questions and group interactions.

WE ARE TALENTED

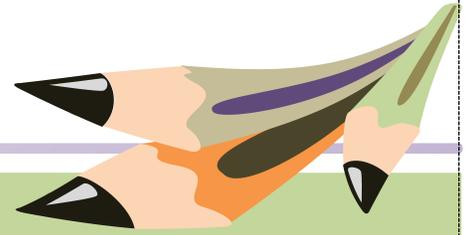

Club students have been honing their artistic skills by participating in: Comics Club, Acting Club, Art Club, Halloween Meets the Classics Club and Talent Show Club. Students had the opportunity to work directly with local artists such as: portrait artist, Christian Scott, comics historian, Richie Graham and artist in school and communities, Donna Gunn.

On November 3rd, Prescott held its 7th Annual Talent Show event with more than 30 students performing on stage in front of staff, family members and friends. Students MC's introduced the acts and led the audience through a journey of Reaching for the Stars.

WE HAVE FUN

Garden Club Leaf Party

WE CARE ABOUT OTHERS

"After having learned several Halloween songs and three masterworks, the **Halloween Music Meets the Masters Club** took their show on the road. First stop - Sumner Place Skilled Nursing & Rehab Center. It was extremely gratifying to see the students interact with and engage the Sumner Place residents with songs like The Pumpkin Tells and Pass the Witches Broomstick, then perform excerpts from In the Hall of the Mountain King and Dance Macabre." (Donna Gunn, club leader)

WE ARE GOOD STEWARDS OF THE EARTH

Taking care of the outdoor classroom, planting, tasting and learning about different vegetables and herbs have been a focus of our **Garden Club** students with plans to continue gardening by utilizing the Tower Garden over the cold months.
